

**FOX RIDE**  
Car Pooling System By Foxit

GLOBAL AGILE  
SERVICES

# Transforming Corporate Transportation

Effective transportation operations require flexibility to adjust and respond to the day-to-day realities once vehicles leave the depot and execute on the road. Fox Ride by Global Agile Services offers an innovative car pooling system designed to optimize pick and drop services for employees, leveraging advanced technology for efficient, reliable, and cost-effective transportation solutions.

# Benefits

**Efficiency and Optimization:** AI-driven route planning for streamlined operations. Ensures the shortest and most efficient routes for all trips.

**Cost-Effectiveness:** Reduces fuel and operational costs through optimized routing. Improves vehicle utilization, minimizing the need for additional resources.

**Enhanced Employee Experience:** Provides employees with timely and reliable transportation. Facilitates direct communication between employees, drivers, and administration.

**Comprehensive Management:** Monitors and manages all aspects of car pooling operations from a single platform. Tracks vehicle maintenance and usage accurately.

# Challenges

**Integration with Existing Systems:** Ensures seamless integration with current company infrastructure and databases.

**Real-Time Data Accuracy:** Maintains accurate real-time location data for effective vehicle dispatching.

**User Training and Adoption:** Trains employees, drivers, and administrators on the new system.

**Scalability:** Ensures the system can handle growing fleets and increased usage.

**Security and Privacy:** Protects sensitive employee data and ensures robust security measures.

# Key Features

**Complete Car Pooling Management:** Manage cars, buses, vans, and other company vehicles. Track and monitor vehicle usage and maintenance schedules.

**Advanced Route Management:** AI-driven route optimization for the shortest and most efficient routes. Handle multiple pick-up and drop-off points effectively.

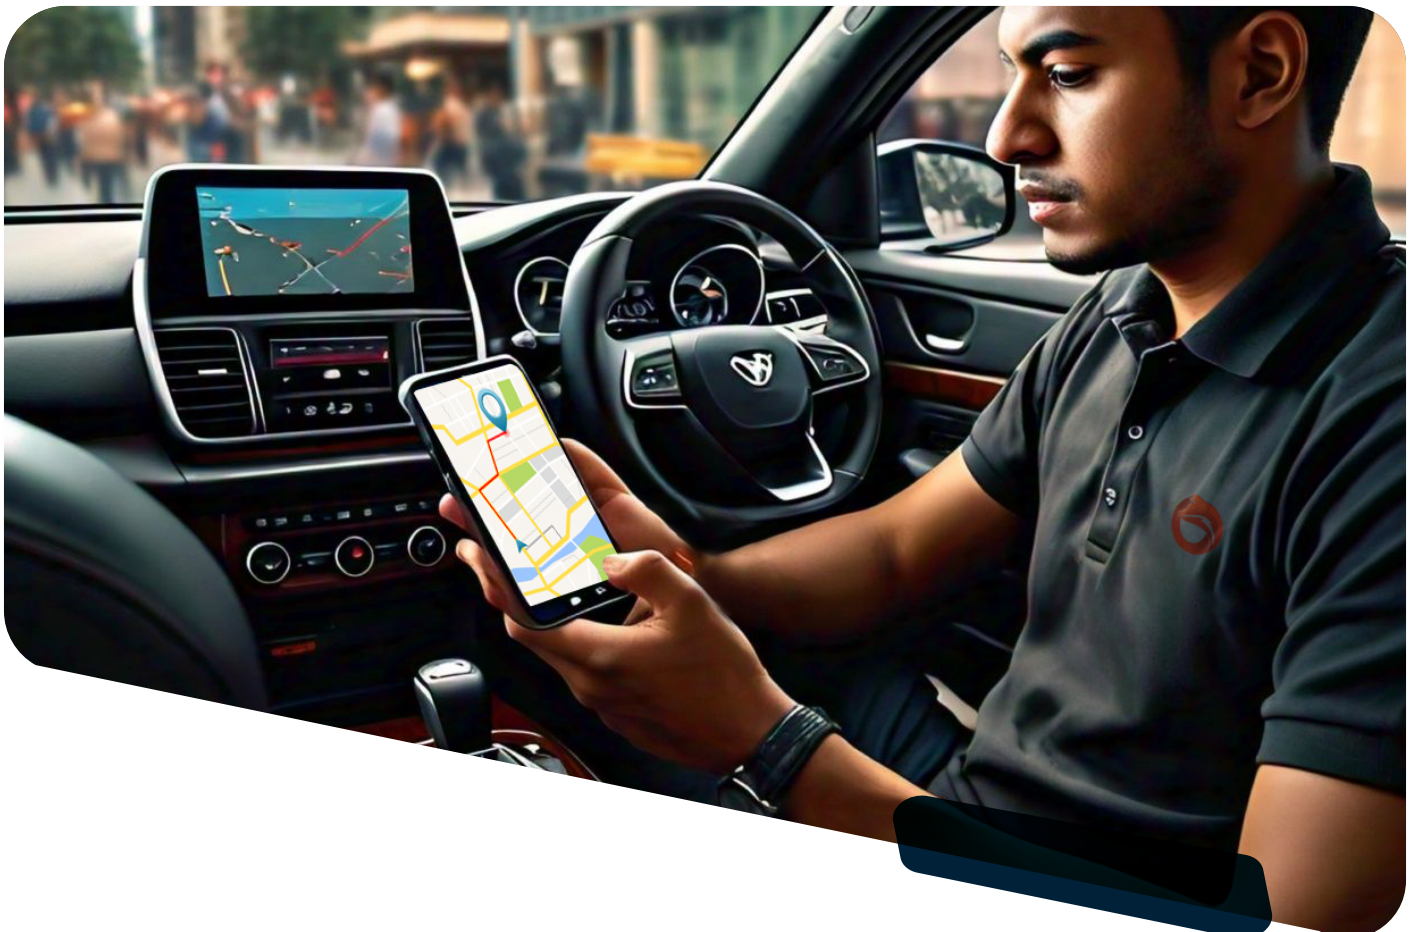

# Shift Management

**Schedule transportation for different shifts:** General Shift: Monday to Friday, 0730hrs departure, 1630hrs return.  
Special Shifts: 7 days a week, two shifts per day; 0700 to 1900hrs & 1900hrs to 0700hrs.

**Management of Departmental Requests:** Departments update ROTA information via a web portal.  
Modify shift details up to 2 hours before arrival time.  
Includes fields such as contact number, address, date, and shift type.

**Daily Transportation Scheduling:** Admin generates daily routes based on department data.  
Ensures optimized routes for efficiency and feasibility.  
Routes sent to relevant drivers and employees.

**Android Application for Drivers:** Route information provided through a mobile app with camera lock.  
Displays pick-up locations with navigation support.

# Notification

Route information via app notifications, email, and SMS.  
Notifies drivers of employee ride cancellations or changes.

**Admin Portal:** Manage ROTA, generate routes, and produce periodic reports.  
Add or remove employees, update ROTA information, and add remarks.  
Regenerate routes based on updated information.

**Vehicle Management:** Categorize vehicles for route generation by area, service type, and shift.

**Driver Management:** Add and update driver information, extract driver reports.  
Assign drivers to vehicles and manage temporary driver assignments.

**Tracking Device Integration:** Track vehicles using tracker information via API from the tracking company.  
Real-time tracking for accurate vehicle location and security.

## Conclusion

Fox Ride by Global Agile Services provides a comprehensive and intelligent car pooling system that enhances efficiency, reduces costs, and improves the overall employee experience.

Despite challenges such as system integration and data accuracy, Fox Ride stands out with its robust features and scalability.

Embrace Fox Ride to elevate your company's transportation logistics and achieve a new level of operational excellence.
